Professional Summary

Highly motivated and result-oriented Software Engineer with over 4 years of hands-on experience in building scalable web applications, RESTful APIs, and cross-platform mobile solutions. Proven track record of leveraging technologies like Python, FastAPI, and React to deliver high-impact products and optimize operational performance.

Education

SZABIST University — Karachi, Pakistan

Bachelor of Science in Computer Science (CGPA: 3.82) | 08/2020 - 06/2024

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Operating Systems, Computer Networks.

Work Experience

Logic Loops Solutions — Senior Software Developer (06/2024 - Present)

- Led a cross-functional team to design and deploy 4 scalable web portals using Python and React.
- Reduced backend response times by 30% by refactoring core FastAPI services and optimizing SQL database queries.
- Mentored junior developers on software engineering best practices, code reviews, and automated CI/CD pipeline deployments.

Code Master Innovative — Junior Developer (08/2022 - 05/2024)

- Built responsive interfaces using React.js and TypeScript, increasing user retention by 15%.
- Integrated secure multi-role user authentication and data serialization layers with PostgreSQL database backend.
- Implemented unit testing suites covering over 85% of critical application logic routes.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++, Java, HTML, CSS

Frameworks & Libraries: React, React Native, FastAPI, Node.js, Express, Django, Pandas, NumPy

Tools & Databases: Git, GitHub, Docker, Postman, VS Code, PostgreSQL, MongoDB, SQLite, Redis

Projects

Customer Churn Prediction System

- Engineered a machine learning model using Python and Scikit-Learn to predict customer subscription cancellation rates.
- Designed an interactive data visualization dashboard using Streamlit to present model parameters to business clients.
- Cleaned, preprocessed, and encoded 10,000+ subscriber records to optimize accuracy.

Automated Web Scraping Pipeline

- Built modular scraping bots using BeautifulSoup and Requests to collect pricing metrics across 5 e-commerce sites.
- Created cron job routines to store collected unstructured data directly into structured PostgreSQL tables.

Certifications

- Google Data Analytics Professional Certificate — Coursera (Issued: 2024)
- Google Cybersecurity Professional Certificate — Coursera (Issued: 2023)
- Advanced React Developer Accreditation — Meta Coursework (Issued: 2023)

Languages

- English (Professional Working Proficiency)
- Urdu (Native Proficiency)
- Sindhi (Professional Working Proficiency)

Achievements

- Awarded Employee of the Month at Logic Loops Solutions for outstanding platform deliveries in Q3 2025.
- Won 1st Prize at University Hackathon for developing a smart utility payment assistant application in a 24-hour sprint.
- Graduated with honors distinction from SZABIST Computer Science Department.
