

MAHNOOR BALOCH

mahnoorbaloch968@gmail.com | 03082373695 | Gharo, Thatta, Pakistan

PROFILE

Motivated Computer Science student with hands-on experience in machine learning, web development, and banking systems. Skilled in building data-driven solutions and applying Shariah-compliant banking concepts. Passionate about leveraging technology in real-world IT and financial environments.

EDUCATION

Bachelor of Computer Science — SZABIST University	<i>Feb 2022 – Present</i>
Diploma in Information Technology — SZABIST ZabTech	<i>Feb 2019 – Jan 2020</i>
Intermediate — Govt Girls Degree College	<i>2015 – 2017</i>
Matriculation — Govt Girls High School Pump House	<i>2013 – 2015</i>

TECHNICAL SKILLS

Programming: C, C++, HTML, CSS, Java, Python, JavaScript, SQL

Libraries / Frameworks: NumPy, Pandas, Scikit-Learn, Matplotlib, Seaborn, Streamlit, BeautifulSoup

Tools: VS Code, Jupyter Notebook, SQL Workbench

Concepts: OOP, Data Structures, Machine Learning (Classification, Regression, EDA), Software Engineering, OS, Networks

Soft Skills: Problem Solving, Communication, Teamwork, Adaptability, Time Management, Leadership

WORK EXPERIENCE

Branch Banking Intern *Jul 2025 – Aug 2025*

BankIslami (Islamic Banking), Gharo

- Assisted customers with account opening in compliance with Islamic banking (Shariah) principles
- Supported daily branch operations with Shariah-compliant financial products and KYC procedures
- Handled basic cash transactions and maintained accurate customer records and documentation
- Gained knowledge of profit-sharing models (Mudarabah) and Islamic financing concepts

Composition and Computer Teacher *Aug 2020 – Aug 2022*

Noor Begum Model School, Gharo

Computer Teacher *Oct 2017 – Nov 2018*

The Citizen Foundation (TCF), Mirpur Sakro

PROJECTS

Bank Loan Prediction System

- Built ML models (Logistic Regression, SVM, Random Forest) for loan eligibility prediction with feature engineering and Exploratory Data analysis (EDA).
- Developed a Streamlit web interface for real-time predictions; evaluated models using accuracy and correlation heatmaps.

Library Management System

- Built a web-based system using local XML for data storage, JavaScript for dynamic data fetching, and HTML/CSS for UI
- Implemented search and filtering features for managing and displaying book records

Web Scraping & Data Extraction

- Developed Python scripts using BeautifulSoup and Requests to extract and clean product data from multi-page websites
- Handled pagination, raw HTML parsing, and error handling for efficient and reliable scraping

Hotel & Banking Management Systems

- Hotel Management: designed front-end booking interface using HTML and CSS
- Banking Management: developed user interface and database layer using HTML, CSS, and SQL
