

MUHAMMAD TALHA ARSHAD

Full-Stack Engineer | TypeScript | React Native | Scalable APIs | Cross-Platform Systems

Karachi, Pakistan | (+92) 311 238 8611 | talhaarshad010@gmail.com | linkedin.com/in/talhaarshad | github.com/talhaarshad010

PROFESSIONAL SUMMARY

What I do:

Build and ship cross-platform production applications in TypeScript and React Native across full delivery cycles from architecture to App Store.

What I bring:

4 years of measurable impact 45% client satisfaction uplift, 20% crash reduction, 100% on-time delivery across all projects.

What I'm building toward:

Python REST APIs, LLM integration, and RAG architectures actively closing the backend and AI gap.

CURRENTLY BUILDING

Python REST APIs with FastAPI | LLM API Integration (OpenAI / Anthropic) | RAG Architectures

PROFESSIONAL EXPERIENCE

Mobile Application Developer

02/2023 – Present

Logic Loops Solutions, Karachi, Pakistan

- Increased client satisfaction by 45% across 6+ cross-platform deployments by architecting scalable React Native solutions with strict TypeScript implementation and modular component design.
- Reduced post-deployment crash rates by 20% and runtime bug rates by 25% by enforcing automated testing pipelines and clean architecture patterns across the full development lifecycle.
- Improved client workflow productivity by 30% by engineering custom Native Bridge integrations that connected mobile interfaces directly to backend service layers across diverse API ecosystems.
- Maintained 100% on-time delivery across all project pipelines by leading cross-functional collaboration between design, backend, and QA teams in Agile sprint environments.

Junior Mobile Application Developer

08/2022 – 01/2023

Code Master Innovative, Karachi, Pakistan

- Boosted client acquisition by 35% by contributing to multi-user mobile applications with pixel-perfect, responsive interfaces built in close collaboration with backend API and design teams.
- Reduced product delivery cycles by 20% by standardising reusable modular components and enforcing strict linting and coding conventions across the codebase.
- Improved mobile codebase maintainability by 40% by applying clean architecture principles and establishing coding standards adopted team-wide.
- Increased user retention by 30% by designing intuitive, performance-optimised UI/UX workflows that prioritised real-world usability over feature complexity.

PROJECTS

Mulder Cross-Platform Music Streaming App

React Native | Redux Toolkit | MongoDB | Node.js | Firebase | Play Store / App Store

- Chose Redux Toolkit over Context API to handle concurrent audio state across 3 playback modes, reducing state-related crashes by 25% in production.
- Engineered low-latency cloud delivery pipelines serving simultaneous iOS and Android users, cutting asset load time by 25% through background caching strategies.
- Sole mobile architect on a 3-person team; owned the full journey from Figma handoff to Play Store and App Store deployment.

Stern's Gym Trainer Management Platform

React Native | Firebase | Multi-Role Auth | Custom UI | Play Store / App Store

- Designed a role-based state architecture supporting trainer and client personas within a single codebase, increasing real-time engagement by 35%.

- Built custom interactive schedule maps from scratch no third-party library lifting navigation engagement by 40% over the initial prototype.
- Delivered end-to-end: requirements, UI design, Firebase Auth integration, and production deployment within a 6-week sprint.

SKILLS

Proficient

TypeScript, JavaScript, React Native, React.js, Next.js, Redux Toolkit, Firebase, MongoDB

Competent

Node.js, REST API Integration, SQL, SQLite, Git, CI/CD Pipelines, Automated Testing

Familiar

Python, FastAPI, LLM APIs (OpenAI / Anthropic), RAG Architectures

Tools

Figma, Adobe XD, Android Studio, Xcode, Postman, VS Code, GitHub

EDUCATION

Bachelor's in Computer Science

08/2023 – Present

SZABIST, Karachi, Pakistan

Relevant Coursework: Data Structures and Algorithms, OOP, Web and Mobile App Development, Database Management Systems, Software Engineering, Operating Systems, Computer Networks.
